

Ferns & Petals Sales Performance Analytics Dashboard

Project Title

Ferns & Petals Sales Performance Analytics Dashboard

Domain

E-Commerce Analytics | Retail Analytics | Business Intelligence

Project Overview

This project analyzes sales data from Ferns & Petals (FNP), an online gifting platform, to understand customer purchasing behavior, product performance, and seasonal demand patterns. The analysis identifies revenue drivers, product category performance, and opportunities to increase average order value and improve delivery efficiency.

Problem Statement

Online gifting platforms experience seasonal demand spikes and operational challenges. Without structured analysis it is difficult to identify top-performing occasions, customer spending patterns, and geographic sales distribution. This project analyzes sales data to uncover growth opportunities and improve decision-making.

Dataset Description

The dataset contains order-level transaction data including order date, delivery date, product name, product category, occasion, city, quantity, and order value. These attributes enable analysis of product performance, seasonal demand, customer behavior, and delivery timelines.

Key Insights

- Total revenue reached ₹35.21 lakhs from 1,000 orders with an average order value of ₹3,520.
- Revenue is highly seasonal with peaks in February and August.
- Anniversary and Raksha Bandhan generate the highest revenue among occasions.
- The Colors product category contributes the largest share of revenue.
- Top products such as Magnam Set and Dolores Gift drive strong sales performance.
- Orders are distributed across multiple metro and tier-2 cities.
- Ordering activity occurs throughout the day with noticeable peak hours.
- Average delivery time is 5.53 days, indicating potential improvement opportunity.

Business Recommendations

- Introduce premium gift collections priced between ₹5,000–₹10,000.
- Launch campaigns to reduce seasonality during low-demand months.
- Expand marketing efforts for top occasions such as Anniversary and Raksha Bandhan.
- Revitalize underperforming categories like Cakes, Plants, and Mithai.
- Develop premium variants of bestselling products.

- Expand marketing campaigns in tier 2 cities.
- Optimize promotions during peak ordering hours.
- Introduce faster delivery options such as 24-hour express delivery.
